

Junior Process Manager – Consultant project control

Our impact as a company

Aryo Systems is an innovative software company consisting of an integrated team of software engineers and process managers.

We efficiently design and follow processes through our no-code software platform. Our team is passionate about their work. We reflect our positive company culture to our customers and projects. Through the structure and clarity we provide, we ensure that everyone can enjoy their work.

What is expected?

- Completed technical education (university, WO).
- Affinity with technology, processes, and IT.
- Excellent command of the Dutch and English language.
- It is a strong advantage if you have knowledge within the domains Aryo Systems is active in, primarily civil and construction management (but also aviation and automotive)
- You are a team player who enjoys working on multiple projects simultaneously.
- Strong communication and persuasion skills.

What do we offer?

- Open corporate culture
- Young and ambitious team of co-workers at the office in The Hague
- Excellent salary plus lease car, telephone and laptop
- 25 vacation days + vacation pay (based on full-time employment)
- Good guidance for a flying start to your career
- The freedom and the possibility to grow quickly
- Knowledge sessions, company drinks and team events.

Your impact on this role

We are looking for a highly motivated (starting) process manager who will lead the implementation of Aryo software in large and complex construction projects. As a process manager, you will be responsible for the successful implementation of Aryo for our construction projects, working closely with project teams, software developers, and other stakeholders. Thanks to you, major infrastructure projects will go smoothly. To achieve this, you will translate the needs of the customer into a concrete solution within Aryo.

Additionally, you will ensure that all users are on board and assist them in using the software as needed. In challenging situations, you take the lead and convince everyone of what is best for the project. With your critical eye, you always seek improvement. This way the project team can achieve better results and the construction project will run even more efficiently.

If you have a passion for technology and the desire to make an impact in the construction sector, contact us – today!
